

MINE PRODDER

The Non-Magnetic Mine Prodder has been developed to locate mines buried at depths up to 250mm. Primarily intended for situations where a magnetic device could activate.

The prodder is lightweight, man portable and is stored until use in a carrier web attached to personnel in service webbing equipment. Each Mine Prodder is tested to ensure compliance with STANAG 2897 Annex C prior to delivery.

NON-MAGNETIC TESTING CERTIFICATION

Note: AB Precision operates a commercially available test facility capable of some magnetic ranging in accordance with this Standardization Agreement.

COMPLETE EQUIPMENT

DESCRIPTION:	PART NUMBER:	QUANTITY:
Spike Holder Assy	3031-120	1
Hand-grip	3031-110	1
Carrier Web	3031-150	1
Tube Assy	3031-130	1
