

PIGSTICK

The Pigstick Disruptor is an established “General Purpose” disruptor suitable for disruption of IED's that are contained in packages such as parcels and briefcases, etc.

Pigstick has been in active service for over 30 years with many bomb disposal teams worldwide and has proven to be an extremely reliable method of disruption.

The Pigstick Disruptor is a multi-shot device capable of many firings and requires minimum maintenance. Training may be carried out using the equipment without detriment to its service performance.

Pigstick may be deployed using the supplied anti roll clamp, an optional lightweight stand or by mounting to a Remotely Operated Vehicle (ROV) such as Cyclops, Guardian and Sentinel.

Preparation of the Disruptor is straightforward and quick to achieve and may be carried out remotely from the target to enhance operator safety.

Pigstick is constructed from non corroding stainless steel parts. Prior to release each equipment is subjected to an over pressure test and flaw detection.

COMPLETE EQUIPMENT

DESCRIPTION:	PART NUMBER:	QUANTITY:
Disruptor Main Body	TX-144A	1
Disruptor Rear Body	TX-163A	1
Split Sleeve Adaptor	TX-2267	1
Contact Cover	TX-1463	1
Water Bottle	ABL1000-19	1
Loading Tool	TX-1454	1
Cleaning Brush		1
Cleaning Handle		1
Screwdrivers	3320-002	1
Screwdriver Small	3320-003	1

PT 1066 CARTRIDGE

Pigstick is operated by a bespoke cartridge. Each batch of cartridges are ballistically tested to ensure correct and consistent performance. The cartridges are supplied in multiples of 18 packaged within an M2A1 container complete with all required consumable parts.

PART NO: PT 1066
NSN: 1385 99 315 0151

TECHNICAL DATA

DISRUPTOR:

Length: 485mm, main body dia: 37mm, rear body dia: 50mm, weight: 2.95 Kg

HOLDALL:

Size: 500 x 300 x 200mm, overall weight: 4Kg
