

Rocket Wrench

The ABP Rocket Wrench allows the user to render safe unexploded munitions which incorporate a 'screw-in' fuse assembly attached by either a left or right hand thread.

The Rocket Wrench is firmly attached to the fuse by means of Jaw Clamps and is set to rotation by means of two eccentrically mounted, electrically initiated 0.5" cartridges and as such is operated remotely, keeping the operator at a safe distance.

The Rocket Wrench is designed to be used by Military, Police and other security forces for rendering safe conventional unexploded bombs etc, or Improvised Explosive Devices (IEDs) housed in containers such as fire extinguishers or household gas canisters where the fuse is of a screw-in type.

EQUIPMENT

Brush Ø18 x 120LG	3258-024
Handbook, Rocket Wrench	3389-002
Bungee Shock Cord, 2 Hooks	3389-013
