

PIGSTICK LIGHTWEIGHT

The Pigstick Lightweight is a general purpose Water jet Disruptor, suitable for render safe procedures on IEDs such as parcels and briefcases.

Made of titanium, this disruptor is extremely lightweight. It is ideal for personnel to carry, or for use on small Remotely Operated Vehicles (ROVs) on which payload weight needs to be kept to a minimum.

It is a multi-shot device, capable of many firings and requiring minimum maintenance. Training can be carried out on this disruptor without causing any detriment to its service performance.

The Pigstick Lightweight may be deployed using the supplied anti-roll clamp, an optional lightweight stand, or by mounting to an ROV such as the Archer, Guardian and Sentinel. Preparation of the disruptor is quick, straightforward, and may be carried out remotely from the target to ensure operator safety.

Prior to dispatch, all items of equipment are subjected to an over- pressure test and flaw detection.

EQUIPMENT

Screwdriver Large	3320-002
Screwdriver Small	3320-003
Laminated Contents	3354-005
Handbook	3354-006
Clamp, Injector	3354-008
Disruptor Assembly	3354-010
Carry Case	3354-040
1 ltr Bottle with Cap	ABL1000-19
Brush	Brush HG
Brush Handle	3320-008
Loading Tool	TX14545

TECHNICAL DATA

DISRUPTOR

Weight:	930g
Length:	483mm
Main Body Diameter:	Ø 32mm
Rear Body Diameter:	Ø 48mm

HOLDALL

Weight:	1.98kg
Length:	500mm
Width:	300mm
Height:	200mm

CARTRIDGES

3476-0301 CARTRIDGE [3476-0300 CARTRIDGE SET]

Pigstick is operated by a bespoke cartridge. Each batch of cartridges are ballistically tested to ensure correct and consistent performance. The cartridges are supplied in multiples of 40 packaged within an M2A1 container complete with all required consumable parts.
